

e-BizSoft, Inc.

Transforming

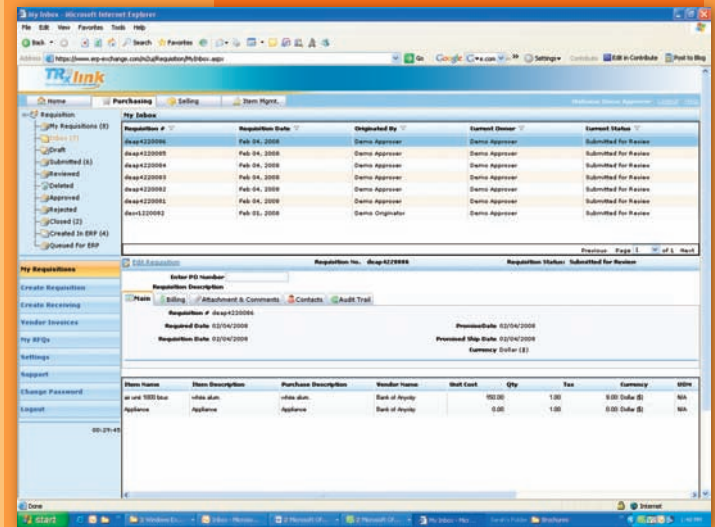

today's business
into e-Business

Extend and optimize your business transactions with Transaction Link™ today!

TRxLink™ from e-BizSoft is a powerful web-based application designed to streamline your sales and purchasing processes, saving you time, effort and money. Our easy-to-use interface allows your users to initiate, review and approve requisitions. Users can then save them as RFQs and purchase orders, and electronically deliver them to vendors. TRxLink™ enables companies to standardize their business workflow from req to check.

TRxLink™ seamlessly interfaces and saves all transactions into your ERP application. Use TRxLink™ to streamline and integrate the entire supply chain between your vendors and your business.

Powerful Web-based Easy to Use

Learn more about Transaction Link™:
www.TrxLink.com

Transaction Link™ is a true B2B transaction workflow system which seamlessly integrates with several ERP applications. This enables both small and large companies across all industries to monitor their transactions in real-time, ensuring consistency and accuracy, reducing errors and redundancies, and increasing levels of operational efficiency. Best of all, TRxLink™ requires **Minimal Software Installation** and **No Capital Investment**. Simply pay-as-you-go and reap the rewards of this unique, centralized sales and purchasing system.

TRxLink™ includes the following features:

PURCHASING

► RFQs

Create RFQs and electronically communicate them to vendors via the *Vendor Portal*. The vendors can then enter pricing information and reply to you. All RFQ responses appear in your *Inbox* to be finalized. Once the RFQ is finalized, data can be transferred to a requisition and submitted for approval.

► REQUISITIONS

Create, review, and approve requisitions.

Once approved, TRxLink's fully integrated agent transfers the purchase orders to your ERP seamlessly.

Allows receipt of goods and services against purchase orders.

Easy-to-use mailbox-like interface.

Powerful search engine allows users to search the ERP application for products and services to include in a requisition. Users can also create new items and vendors on the fly, as well as create new requisitions from previously submitted ones.

► RECEIVING

Receivings are generated in your ERP for a classic three way match of Purchase Order, Vendor Invoice, and Receipt.

SALES

Create, e-mail and print quotations, sales invoices and sales orders on the web, while having complete access to the data in your ERP.

Finalized quotations will be created seamlessly in your ERP.

One or more sales orders can be combined to create a Performa Invoice, which can convey export documentation and additional charges, typically associated with export of goods.

VENDOR PORTAL

Web-based portal for vendors facilitates receiving of POs and responding to RFQs.

Allows vendors to receive, create, and submit invoices with just a few clicks.

Aids in communication between the customer and the vendor by providing status changes of POs, Shipments, Receipts, etc.

Receive invoices from vendors via the Vendor Portal directly in TRxLink™.

TRxLink™ fully integrates with Microsoft® Dynamics® GP, NAV, AX, Intuit® QuickBooks®, and MAS 90 and MAS 200.

About e-BizSoft, Inc.:

e-BizSoft, Inc., is a leading business software solution provider that specializes in customization, web applications, and information exchange. e-BizSoft extends ERP systems and streamlines supply chains to simplify processes, improve accountability, and foster productivity.
